AGRO POWER

APPLICATION GUIDE

Edition 2020

HIGH-TECH MACHINES REQUIRE HIGH-TECH DRIVE TECHNOLOGY

The company Optibelt has been manufacturing drive belts in the most diverse designs since 1948 – based on over one hundred years of experience in rubber processing.
Due to constant investments in material research and production technology as well as to the increasing knowledge about the basic conditions which are linked to the various application areas, the performance limits of machines have been shifted via the advancement of the belts to the high-tech drive elements of today.

Optibelt AGRO POWER

QUALITY BELTS MADE BY OPTIBELT

Bigger, faster, further – extraordinary top performances have always fascinated people in all areas of technology. Again and again, engineers, scientists and researchers are going beyond the limits of feasibility.

However, what is it that drives us to develop something unique?

Why do we always want to be one step ahead of competition?

Our motivation lies in passion and precision. Brand-name products by Optibelt are an active investment protection for you.

As our drive belts stay invisible in your products, we add what is often missing elsewhere: responsibility and quality.

Day by day, we set examples with our top products, the Optibelt AGRO POWER series, and make sure that the best solution is implemented for every application. Everywhere around the world.

© OPTIBELT GMBH, GERMANY

HOW WE GET OUR DRIVE

Optibelt is characterised by this passion for technology.

Every employee adds her/his special knowledge, enthusiasm, visions and initiatives for technological advance on the highest level. That you can be sure of!

No machines without drive technology. If you imagine the modern world without drive technology, there would not be much left operating. Without drive technology machines would be unthinkable. Drive technology makes sure that the primary power of an engine is transformed for diverse working processes and thus made usable. Here, it is most important that the power of the engine is adapted to the process with help of the functional elements.

First and foremost, the belts are the central and most efficient element of it all. They stretch almost all shaft distances at comparably low costs and low maintenance. And they achieve this without lubrication or guidance elements.

Thus, drive technology with belts is far superior to roller chain drives or spur wheel sections. The diverse application areas, their adaptability and economy have made belt drives become an essential part of mechanical engineering in all sectors.

HOW WE FOSTER OUR COMPANY VALUES

Internationally, Optibelt is highly estimated and represents excellent brand quality – made in Germany.

This rating is not least the result of our believe, as a family-run company, in our roots in Höxter and thus, in the location Germany.

In addition to that, the company history of Optibelt is closely linked with groundbreaking technical developments: from industrialisation to the automated world.

Optibelt has faced each of these milestones with clear sight and pioneer spirit.

This interaction of tradition and innovativeness characterises the key values of our company. For over 145 years now.

We are keeping our company philosophy even as a modern company: in our international distribution companies as well as in our production and service companies. Here, the training and further education is the key factor for the consistent quality that you can always expect from our products. Your advantage: We exceed the standards of our competitors by far and meet requirements such as just-in-time production, on-stock availability, customer proximity, support and flexibility with ease and commitment.

Because your drive drives us!

Competency in drive technology

OPTIBELT SERVICE MANAGEMENT

The best machine is of little value if it is not operated efficiently. The main objective has to be the optimisation of existing power drives.
The Optibelt Service Management offers a broad range of technologically demanding products. Service devices, thematic expert seminars and, last but not least, customised software solutions for drive design and optimisation complete the high-tech segment of Optibelt.

THE OPERATIONAL LIFE IS OF ESSENTIAL IMPORTANCE

Half of all drives achieve only between 50 to 70 percent of the estimated operational life; about 20 percent achieve a longer operational life whereas about a third of all drives only achieve 10 to 20 percent of the estimated time. The causes of drive problems are diverse. The biggest problem by far is improper maintenance of the drive; this applies to approx. 40 percent of all cases. An incorrect installation of the belts or the pulleys causes problems for 20 percent of the drives; the same percentage applies to negative external influences as the cause for drive problems. Furthermore, about 12 percent of the problems are due to an incorrect drive design and 4 percent each due to defective drive elements and improper storage or handling of the drive belts.

OPTIMISE DRIVES IN THEORY AND PRACTICE

Cost reductions can easily and quickly be achieved via simple but highly efficient tools.
Simply use the technical equipment by Optibelt for trouble-free operation of the individual installation.

PROBLEMS – CAUSES – REMEDIES

V-BELTS

PROBLEM	POSSIBLE CAUSES	REMEDIES
	BELT BREAKS AFTER SHORT RUNNING PERIOD (BELT TORN)	
	Forceful mounting, therefore, damaging the tension cord	Apply unforced mounting according to instructions
	Drive blocked	Remove the cause
	Ingress of foreign matter during operation	Fit a guard
	Drive underdimensioned, insufficient number of belts	Check drive conditions and remachine
	EXCESSIVE WEAR ON BELT EDGES	
	Tension too low	Check tension and retension
	Starting torque too high	Check drive conditions and remachine
	Worn pulley grooves	Replace pulleys
	Wrong belt/groove section	Adjust belt and groove sections
	Wrong groove angle	Remachine or replace pulleys
	Pulleys do not align	Allign pulleys
	Small pulley diameter below recommended minimum	Increase pulley diameter (new drive design), use Optibelt special execution or **optibelt SUPER XE-POWER PRO M=S (SUPER TX)**
	Belt slips or catches on protruding parts	Remove protrusions or realign drive
	CUTS AND SPLITS AT THE BASE OF THE BELT (BRITTLENESS)	
	Outside idler pulley in use the arrangement and diameter of which does not comply with our recommendations	Note Optibelt recommendations, e.g. increase diameter. Increase size of existing idler. Use **optibelt RED POWER 3** or Optibelt special execution.
	Abnormal belt slip	Retension drive according to installation instructions. Check drive conditions and redesign, if necessary. Redesign using minimum pulley diameters.
	Pulley diameter too small	Use Optibelt special execution or **optibelt SUPER X-POWER M=S (SUPER TX)**
	Ambient temperature too high	Ensure good ventilation, protect belts from direct heat. Use Optibelt XHR special execution (extra heat resistant) or use **optibelt SUPER X-POWER M=S (SUPER TX)** or belt with aramid cord construction.
	Ambient temperature too low	Warm area surrounding drive and belt before use. Use Optibelt special execution.
	Chemical influences	Protect drive from contamination. Use Optibelt special execution.

© OPTIBELT GMBH, GERMANY

PROBLEMS – CAUSES – REMEDIES

V-BELTS

PROBLEM	POSSIBLE CAUSES	REMEDIES
	BELT SWELLING OR SOFTENING	
	Contamination by oil, grease, chemicals	Protect drive from contamination. Use raw edge **optibelt SUPER X-POWER M=S (SUPER TX)** or special execution "05". Clean pulley grooves with petrol or alcohol before using new belts!
	BELTS TURN OVER	
	Wrong belt/groove section	Realign belt and groove section correctly
	Pulleys do not align	Realign pulleys
	Pulley grooves severely worn	Replace pulleys
	Tension too low	Retension drive
	Excessive vibrations	Use inside idler pulley on drive slack side or **optibelt KB** kraftbands
	Foreign matter in pulley grooves	Remove foreign matter and protect drive

If further problems arise, contact our engineers from the applications engineering dept. Detailed technical data are necessary for specific assistance.

PROBLEMS – CAUSES – REMEDIES

RIBBED BELTS

PROBLEM	POSSIBLE CAUSES	REMEDIES
	UNUSUAL WEAR AND TEAR OF RIBS	
	Tension too low	Correct tension
	Ingress of foreign matter during operation	Fit a guard
	Pulleys do not align	Align pulleys
	Pulleys defective	Remachine or replace pulleys
	Wrong rib/pulley section	Align rib and pulley section
	BREAK OF RIBBED BELTS AFTER SHORT RUNNING TIME (BELTS TORN)	
	Ribbed belt slips or catches on protruding parts	Remove protruding parts; realign drive
	Drive blocked	Remove cause
	Drive overloaded	Check drive conditions and redesign
	Effects of oil, grease, chemicals	Protect drive from environmental influences
	CUTS AND SPLITS IN THE RIBS (BRITTLENESS)	
	Effects of an outside idler pulley the arrangement and diameter of which does not comply with our recommendations	Comply with Optibelt recommendations, e.g. increase diameter; use an inside idler pulley on the drive slack side
	Pulley diameter too small	Ensure minimum pulley diameter
	Ambient temperature too high	Remove source of heat, protect belts from direct heat. Improve air ventilation.
	Ambient temperature too low	Warm up ribbed belt before use
	Abnormal belt slip	Retension drive according to installation instructions. Check drive conditions and redesign if necessary.
	Chemical influences	Protect drive from contamination

If further problems arise, contact our engineers from the applications engineering dept. Detailed technical data are necessary for specific assistance.

© OPTIBELT GMBH, GERMANY

PROBLEMS – CAUSES – REMEDIES

KRAFTBANDS

PROBLEM	POSSIBLE CAUSES	REMEDIES
	FRAYED, WORN OR DAMAGED TOP OF TIE-BAND	
	Interference with guard	Check guard
	Backside idler malfunction or damaged	Repair or replace backside idler
	MULTIPLE BELT COMES OFF DRIVE	
	Debris in pulleys	Clean grooves. Use single belts to prevent debris from being trapped in grooves.
	ONE OR MORE RIBS RUN OUTSIDE OF PULLEY	
	Misalignment	Realign drive
	Undertensioned	Retension
	TIE-BAND SEPARATION	
	Worn pulleys	Replace pulleys
	Improper groove spacing	Use standard groove pulleys
